AAHAN SRIVASTAVA

+91-8296761750 | aahansri200@gmail.com | LinkedIn | GitHub

OBJECTIVE

Computer Science undergraduate skilled in Python, machine learning, and data-driven application development, seeking an AI/ML or Data Analyst role to apply predictive modeling and data analysis skills to real-world problems.

INTERNSHIPS

Quaere Technologies Pvt Ltd — **Lucknow, Uttar Pradesh**
Frontend Developer Intern — *May 2025 – July 2025*

- Participated in regular sprint meetings and project reviews, strengthening understanding of **Agile methodology**.
- **MyPaathshala School Management System** — built dashboards for attendance and grade tracking, improving student data accessibility.
- Authored a professional project report titled **"Cybersecurity in Information Management"**, analyzing real-world data threats and security practices used in entrance IT systems.

Eloquence Consortium Club — **Chandigarh University**
Team Head — *Nov 2024 – Present*

- Promoted the importance of soft skills and innovation culture among students through structured workshops and awareness programs.
- Designed and delivered interactive training sessions on communication, leadership, teamwork, and creative problem-solving — reaching **100+ students** across multiple events.
- Organized and coordinated major events including **SpeakStorm** and the **Resume Building Workshop**, from planning to execution.

PROJECTS

Crypto Tracker — Live Cryptocurrency Monitoring App

- Built a real-time cryptocurrency tracking web application using **React** with a backend integration for live price data.
- Implemented live monitoring of multiple cryptocurrencies with continuously updated prices, trends, and market data.
- Tech Used: React.js, JavaScript, and backend APIs for real-time data fetching.

GitHub: github.com/Aahan2214/REACT-PROJECTS

Predictive Maintenance System for Vehicles

- Built using Python, NumPy, Pandas, and Matplotlib to monitor vehicle health and predict maintenance needs.
- Analysed vehicle sensor and performance data to detect abnormal patterns and predict maintenance requirements in advance, reducing breakdowns and improving reliability. Tech: Python, NumPy, Pandas, Matplotlib, API integration.

House Price Prediction

- Developed a House Price Prediction system using Python and **Linear Regression**, performing data preprocessing, feature selection, and model training to accurately estimate property prices from multiple features.

EDUCATION

Chandigarh University	Bachelor of Engineering — Computer Science Engineering	Mohali, Punjab 2023 – 2027
Bangalore International Academy	Intermediate	Bengaluru, Karnataka 2021 – 2023

SKILLS

Programming & ML: Python | C++ | JavaScript | NumPy | Pandas | Matplotlib | Linear Regression | DSA

Web Development: React.js | Express.js | Node.js | HTML | CSS | Tailwind CSS | FastAPI

Databases & Tools: SQL | MongoDB | DBMS | Git | Postman | VS Code | Docker | AWS (Basics)

Core CS: OS | OOPs | System Design

CODING PROFILES

LeetCode | HackerRank | AtCoder

ACHIEVEMENTS

- Athletics: Silver medal at Sports Meet (2022) and 1st place in Tug of War.
- Tech Era 2.0: 2nd Prize.

COURSES & CERTIFICATIONS

- Patent Law — University of Pennsylvania (offered by Chandigarh University), Coursera
- Google Prompting Essentials — Certification of Completion, Coursera Link
- Data Manipulation — Coursera
